

OgmentorID

Master Privacy Policy & Security Framework (v3.0)

Effective Date: April 15, 2026

Scope: This document outlines comprehensive data protection, regulatory compliance, and cyber-security threat mitigation protocols for the OgmentorID platform.

1. Introduction & Age Restriction

Welcome to OgmentorID. By using this Service, you explicitly consent to the data practices described herein. You must be at least 18 years of age to use this Service. We do not knowingly collect personal or psychometric data from anyone under 18. Any accounts found in violation of this age restriction will be immediately terminated and the associated data permanently purged.

2. Notice at Collection & Data Retention

We collect the following categories of data. We retain this data strictly to operate our proprietary algorithms, after which it is permanently destroyed:

- **Identifiers & Telemetry:** Name, email, IP address, device fingerprint, and network request metadata (Retained until account deletion, or indefinitely if linked to malicious activity).
- **Psychometric & Profiling Data:** Behavioral assessment results, OCEAN scores, and generated performance archetypes (Retained until account deletion).
- **Behavioral Biometrics (Illinois BIPA Notice):** If you engage in Layer 3 timed cognitive assessments, we may track keystroke dynamics, touchscreen pressure, and physical interaction speeds to measure cognitive velocity. This specific behavioral biometric data is retained for a maximum of 3 years from your last interaction, as mandated by the Illinois Biometric Information Privacy Act (BIPA), before permanent destruction.

3. State-Specific Profiling & Sensitive Data (CO, VA, CT)

Under the laws of Colorado, Virginia, and Connecticut, the psychometric analysis we perform constitutes "Profiling" and the collection of "Sensitive Data." We operate on a strict **Affirmative Opt-In** basis. We will not process your assessment data without your explicit consent provided during account registration.

4. Washington My Health My Data Act (MHMDA) Disclosure

Because our Layer 2 and Layer 3 assessments evaluate "stress baselines" and "cognitive traits," Washington State law may classify this as "Consumer Health Data" (mental status). **We do not sell or share this data with third parties for cross-context behavioral advertising.** You must

affirmatively opt-in to the processing of this data. A separate Consumer Health Data Privacy Policy is available on our platform.

5. California Privacy Rights (CPRA, CCPA & CalOPPA)

- **Selling vs. Sharing:** We DO NOT "sell" your personal information. We DO NOT "share" your personal information with third parties for cross-context behavioral advertising.
- **Global Privacy Control (GPC):** Our infrastructure is configured to recognize and respect Global Privacy Control (GPC) signals and "Do Not Track" (DNT) browser headers.
- **Limit Use of Sensitive Information:** You have the right to direct us to limit our use of your Sensitive Personal Information (including psychometric profiles) strictly to that which is necessary to perform the core Service.
- **Right to Know & Delete:** You may request a structured copy of your data or request complete deletion. We utilize identity verification protocols before executing any such requests.

6. Cyber-Security, Fraud Prevention & Threat Intelligence

To protect OgmentorID from all forms of cyber-attacks, data poisoning, and unauthorized scraping, we actively collect and process device telemetry, IP reputation scores, and request patterns. This data is processed under the legal basis of "Legitimate Interest" to secure our platform. We reserve the right to share threat intelligence (e.g., malicious IP addresses) with third-party security vendors and law enforcement if an attack on our infrastructure is detected.

7. Third-Party Processors & Infrastructure

We utilize enterprise-grade cloud providers (e.g., Google Firebase) to host our data securely. While we implement commercially reasonable security measures (including TLS encryption in transit and AES-256 encryption at rest), no system is impervious to advanced persistent threats or zero-day exploits. You acknowledge and assume the inherent risks of transmitting sensitive psychometric data over the internet.
